

Introduction to Road Safety Auditing Modules

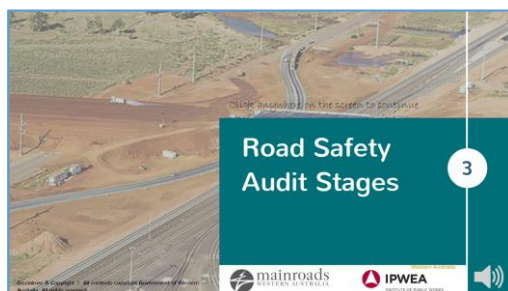

This module provides an overview of the Safe System approach to road safety adopted by National and State governments to generate improvements in road safety. The module will also explain how Safe System principles are applied to the road safety audit process in Western Australia.

Module completion time approximately: 0:40 mins

This module provides an overview of the road safety audit process and sets out the benefits and obstacles that can be faced when conducting a road safety audit in Western Australia.

Module completion time approximately: 0:35 mins

This module provides an outline of the 4 design stages of the road safety audit process. A road safety audit may be conducted at one or more of the following stages as a design proceeds from concept to implementation:

- feasibility stage;
- preliminary design stage;
- detailed design stage; and
- pre-opening stage (or post-opening if conducted just after the project opens).

This module also includes information relating to the road safety assessment of an existing road by conducting a Road Safety Inspection.

Module completion time approximately: 0:25 mins

The purpose of this module is to step you through the road safety audit process, from identifying whether or not you need a road safety audit for your project, to selecting an audit team and responding to the road safety audit report. This module also considers confidentiality and how it relates to the road safety audit process.

Module completion time approximately: 0:50 mins

The purpose of this module is to provide an outline about the application of the road safety audit process to land use developments. This module includes information about how to undertake audits on these types of projects and associated issues that can be encountered.

This type of project can have significant political input, as there are often competing interests involved (Developers, money, government, asset owners, tax/ rate payers etc.). A road safety audit is an effective tool used in State Administration Tribunals (SAT) for development projects. It is also important to ensure audit teams have appropriate experience when conducting this type of audit.

Module completion time approximately: 0:40 mins

The purpose of this module is to outline the legal issues related to the road safety audit process.

Module completion time approximately: 0:35 mins
