

Road Safety Auditor Requirements

Checklist

To become a Road Safety Auditor you shall:

Requirement	Checklist
Have a minimum of two years' crash investigation or road safety engineering experience.	
Knowledge of current practice in road design or traffic engineering principles.	
Have been an Audit Team Member or Audit Team Trainee on at least two road safety audits led by an accredited Senior Road Safety Auditor within the previous two years. Audits must be either: Feasibility, Preliminary Design, Detailed Design or Pre-Opening stage audits.	
Have completed the WA Road Safety Audit Seminar, OR a recognised equivalent Australian / New Zealand training course in Road Safety Auditing within the previous five years.	

You are required to provide:	
A completed application form detailing the above requirements.	
Evidence of audits attended (including a copy of the audit report front cover page and the page listing your name and the role you performed in the audit).	
Evidence of attendance at the WA Road Safety Audit Seminar or recognised equivalent (Course Certificate).	
Supporting information of two years relevant experience (CV, Resume etc.).	

As Road Safety Auditors we use our knowledge and skills for the benefit of the community to assist with delivering safer roads. In doing so, we strive to serve the community ahead of other personal or sectional interests. By making this application you agree to commit to practice in accordance with the IPWEA (WA) Road Safety Auditors Code of Conduct and accept that you will be held accountable for your conduct under the IPWEA (WA) Complaints Procedure.
