

## Senior Road Safety Auditor Requirements

### Checklist

**To become a Senior Road Safety Auditor you shall:**

Requirement	Checklist
Have a minimum of five years' recent crash investigation or road safety engineering experience.	
Knowledge of current practice in road design or traffic engineering principles.	
Have been an Audit Team Member on at least five road safety audits within the previous two years under the guidance of an accredited Senior Road Safety Auditor. Audits must be either: Feasibility, Preliminary Design, Detailed Design or Pre-Opening stage audits.	
Have successfully completed the WA Road Safety Engineering – Treatment of Crash Locations training course, or a recognised equivalent Australian / New Zealand training course within the previous five years, <b>OR</b> be a current practising WA accredited Road Safety Auditor.	
Have successfully completed the WA Road Safety Audit training course, or a recognised equivalent Australian / New Zealand training course within the previous five years, <b>OR</b> be a current practising WA accredited Road Safety Auditor.	
Have led a Road Safety Audit Team within Australia under the guidance of an Independent Mentor who is an accredited Senior Road Safety Auditor.	

You are required to provide:	Checklist
A completed application form detailing the above requirements.	
A signed Checklist for Mentoring of Trainee Team Leaders (completed by the Independent Mentor).	
Evidence of audits attended. This is checked automatically for all applicants in WA via the automated application process. <i>(Applicants from outside WA must include a copy of the audit report front cover pages and the page that displays the audit stage, the audit team membership and the page listing your name and the role you performed in the audit).</i>	
Evidence of attendance at the WA Road Safety Audit and WA Road Safety Engineering – Treatment of Crash Locations training courses or recognised equivalent. This is checked automatically for all applicants in WA via the automated application process. <i>(Applicants from outside WA must include a copy of Course Certificates).</i>	
Supporting information of five years relevant experience including a <b>targeted</b> CV that includes relevant details of your crash investigations and road safety engineering experience.	

*As Road Safety Auditors we use our knowledge and skills for the benefit of the community to assist with delivering safer roads. In doing so, we strive to serve the community ahead of other personal or sectional interests. By making this application you agree to commit to practice in accordance with the Main Roads WA / IPWEA (WA) Road Safety Auditors Code of Conduct and accept that you will be held accountable for your conduct under the Main Roads WA / IPWEA (WA) Complaints Procedure.*
